

Value-Aligned AI Reflective Diaries

An anonymous web prototype for adolescent early
emotional support

Prototype study

Ava Zhang

Anonymous · non-diagnostic · safer next step

AI can support, but it cannot pretend to be therapy.

Can a value-aligned AI reflective diary help students feel understood and identify one safer next step?

Why it matters

Many students are not ready to talk to a parent, teacher, or counselor, but may be willing to write anonymously first.

Safety boundary

No diagnosis, no identity labels, no identity prediction, no school/name collection, and no replacement for counseling.

Pre-test → AI diary → Post-test

The same five 1-5 items measured perceived support before and after the experience.

01

Consent and privacy

PRIVACY

知情同意

匿名：不会收集姓名、学校、班级、手机或邮箱。

自愿：可以继续，也可以选择不参加。

我同意，开始体验

02

Five-item pre-survey

PRE-SURVEY

此刻的感受

请按你现在的真实感觉选择。没有标准答案。

我觉得有人理解我

我知道下一步能做什么

我愿意继续整理这件事

03

Select or enter a concern

CONCERN

先选一个情境

只是想把事情理清楚

和朋友或同学有关

家庭或学校压力

自己写一段心事

04

Generate AI diary

AI DIARY

整理成一篇匿名日记

最近我有点说不清楚自己的感受...

生成匿名日记

匿名日记：我正在尝试把心里的混乱变成可以被看见的文字。

05

Post-survey + feedback

POST-SURVEY

读完之后

再次选择 5 个小问题，并留下开放反馈。

匿名日记让我有被理解的感觉

这篇日记里有没有哪一句让你有感觉？

From 44 records to the core sample

Formal release dataset

44

participant records

Core valid sample

24

pre-post + AI diary

Full feedback subset

10

complete open feedback

Analyzed high-school student records submitted after the final confirmed revision of the website. Core complete means pre-survey + post-survey + generated AI diary.

Core sample increased by +2.04 points

Core complete sample: N = 24. Total score range: 5-25.

Direction

14 improved · 8 unchanged · 2 decreased

Open feedback subset

9 / 10 felt understood

Useful as early usability feedback, not proof of clinical effectiveness.

The product value is not therapy. It is lowering the first barrier to help-seeking.

A better route is B2B: schools, youth programs, and mental health education platforms.

Product position

Anonymous reflection + risk-aware language + resource navigation + escalation to human support when needed.

Honest limitation

Because this was a small convenience sample without a comparison/control condition, the results show promising feedback, not causal proof.

Built for return visits.

The next version turns one-time reflection into a calmer habit students can revisit.

01 Anonymous diary library

A directory page records saved anonymous diaries, so students can look back and notice patterns over time.

02 Bubble sound feedback

Soft bubble sounds make writing feel warmer, calmer, and less like a formal survey.

03 Online rollout

The next step is publishing the tool online for more high-school students to try.

Thank you.
